PRACTICE

Practice means any role, whether remunerated or not, in which you use your skills and knowledge as a health practitioner in your profession. Practice in this context is not restricted to the provision of direct clinical care. It also includes using professional knowledge (working) in a direct non-clinical relationship with clients, working in management, administration, education, research, advisory, regulatory or policy development roles and any other roles that impact on safe, effective delivery of services in the profession.

RECENCY OF PRACTICE

To ensure that you are able to practise competently and safely, you **must** have recent practice in dentistry and in any field of practice (including specialist, endorsement or division of the register), in which you intend to work during the period of registration for which you are applying.

If in the previous five years you have not practised in dentistry or the field of practice in which you intend to work during the period of registration, you will need to satisfy the Board's recency of practice requirements.
